- Damp paper
- Creased paper
- Wrinkled paper or paper prone to be curled
- Extremely smooth or rough surface paper

Do not use the types of paper listed below since they may cause an equipment malfunction.

- Paper whose surface is specially treated
- Paper once printed with other copiers or printers

□ Storing paper

Note the following points when storing paper.

- Wrap the paper in its packaging to prevent it from gathering dust.
- Do not expose the paper to direct sunlight.
- Do not store the paper in a humid location.
- Store the paper on a flat surface to prevent it from becoming curled or creased.

■ Loading paper in the drawer

Note

Press it down until you hear a click sound and it is no longer lifted up.

- 3** Remove the side guides.

- 4** Attach the side guides according to the paper size.

5 Load paper face up in the drawer.

Notes

- Up to 250 sheets (80 g/m² or 20 lb. Bond) can be loaded. Be sure that the height of the stacked paper does not exceed the line indicated inside of the trailing guides.
 📖 P.15 "Acceptable paper types"
- Fan the paper well before loading it in the drawer, otherwise multiple feeding could occur. Be careful not to cut your fingers.
- The printable side may be noted on its packaging.

6 Move the end guide to the trailing edge of the paper while pushing its lower part in the direction of the arrows.

Note

Widen the gap with both hands.

7 Push the drawer straight into the equipment slowly until it stops.

⚠ CAUTION

Do not catch your fingers in the drawer when closing it.
 This could cause injury.

Register the paper size into the equipment.

When you load paper in the drawer for the first time, register the paper size. Be sure to register it correctly, otherwise it could cause a paper misfeed.

For the registration, see the following pages:

📖 P.24 "Preparation 3 - Registering Paper Size and Type"

Note

Be sure to register the paper size each time you have changed it.

■ Loading paper on the bypass tray

Note

The contents of the original(s) are rotated when copied on paper of the following sizes fed from the bypass tray.

A/B format: A3, A4-R, A5-R, B4, B5-R, FOLIO

LT format: LD, LG, LT-R, ST-R, COMP, 13"LG, 8.5"SQ

K format: 8K, 16K-R

For example, to copy an A5-size original, place the original on the original glass in A5 portrait orientation and paper on the bypass tray in A5 landscape orientation (A5-R).

To enlarge an A4-size original to A3, place the original on the original glass in A4 portrait orientation and A3 paper on the bypass tray.

The illustrations below are example of loading A4/LT size paper.

For the acceptable paper, see the following pages:

📖 P.15 "Acceptable paper types"

1 Open the bypass tray.

2 Release the lever on the left, and then load paper face down and straight on the bypass tray.

Note

The printable side may be noted on its packaging.

3 Align the side guides with the edges of the paper, and then push back the lever.

Notes

- Up to 50 sheets of plain paper (80 g/m² or 20 lb. Bond) can be loaded. Be sure that the height of the stacked paper does not exceed the indicators of the side guides. If paper other than plain is used, set it one sheet at a time.
- Fan the paper well before loading it on the bypass tray, otherwise multiple feeding could occur. Be careful not to cut your fingers.
- Do not push the paper forcibly into the entrance of the bypass feeder, otherwise it could cause a paper misfeed.

Tip

When you use paper longer than the bypass tray size, pull out the paper holder from the tray, and then open it.

■ Loading an envelope on the bypass tray

For the acceptable envelope sizes, see the following pages:

📖 P.15 “Acceptable paper types”

Notes for using envelopes

Do not use the following envelopes, otherwise they may cause a paper misfeed or damage to the equipment.

1. Badly curled, wrinkled or folded envelopes
2. Extremely thick or thin envelopes
3. Wet or damp envelopes
4. Torn envelopes
5. Envelopes which include the contents
6. Non-standard size envelopes (ones with a special shape)
7. Envelopes with eyelets or windows
8. Envelopes sealed with adhesive paste or tape
9. Partly-opened or perforated envelopes
10. Envelopes with special coating on the surface
11. Envelopes with glue or double-sided adhesive tape

Note

Store envelopes at room temperature and away from heat and moisture.

- 1 Place an envelope on a flat clean surface and press it with your hands in the arrow directions as shown below to expel air from the inside.**

Press it well to prevent the flap from rolling upward.

Correct bent corners of the envelope.

- 2 Open the bypass tray.**

- 3 Release the lever on the left, and then load the envelope face down on the bypass tray.**

Place the envelope with its flap side at the front as shown below.

Note

Do not copy or print on the back of envelopes, otherwise it may cause a paper misfeed or soil them or the inside of the equipment.

- 4** Align the side guides to the edges of the envelope, and then push back the lever.

1

Preparation 3 - Registering Paper Size and Type

When you load or change paper, a pop-up window appears. Follow the instructions to register the items below in the equipment.

■ Acceptable originals

Acceptable originals differ depending on the setting position. See the table below for more details.

If you are using the Automatic Document Feeder, you can automatically scan a stack of plain paper originals at one time.

Setting position	Type	Maximum size	Acceptable sizes for automatic size detection*1	Maximum number of sheets
Original glass	Plain paper Special paper Booklets	A4 or LT	-	-
Automatic Document Feeder	Plain paper (50 - 104 g/m ² , 13 - 27 lb. Bond)	A3 or LD	A/B format: A3, A4, A4-R, A5-R, B4, B5, B5-R LT format: LD, LG, LT, LT-R, ST-R, COMP K format: 8K, 16K, 16K-R	50 sheets (80 g/m ² , 20 lb. Bond) (or stack height 9.5 mm)*2

*1 The automatic size detection function is only available when the Automatic Document Feeder is installed.

*2 The maximum number of sheets acceptable varies depending on the type of original.

□ Maximum number of originals scanned at one time

You can scan up to 50 original sheets at one time. When the number of sheets to be scanned exceeds 50 or the built-in memory in the equipment is full, scanning stops and an error message is displayed on the LCD screen. To copy the data scanned so far, select “PRINT”. To delete them, select “CANCEL JOB”.

□ Precautions for Automatic Document Feeder

Do not use the following types of original as they may cause a paper misfeed or damage to the equipment:

- Originals that are folded or curled
- Originals with carbon copies
- Originals that have been taped, pasted, or cut-out
- Originals that have been clipped or stapled
- Originals with holes or tears
- Originals that are damp
- Overhead transparencies or tracing paper
- Coated paper (e.g. coated with wax)
- Originals with multiple holes punched (e.g. loose leaf paper)

The following types of originals can be used but need extra care:

- Originals that you cannot slide with your fingers or whose surface is specially treated (they may not be able to be separated from each other at feeding)
- Originals that are folded or curled (should be smoothed out before being used)

When black streaks appear

If the scanning area or the guide area is dirty, image problems such as black streaks may occur. Weekly cleaning of these areas is recommended.

📖 P.104 “Regular Cleaning”

■ Copying originals

Follow the common basic instructions below to make a copy.

1 Place the original(s).

- **Placing originals on the original glass**
 - 1) Raise the platen cover or the Automatic Document Feeder.
 - 2) Place the original face down on the original glass.
 - 3) Align the original with the top-left corner of the original glass.
 - 4) Lower the platen cover or the Automatic Document Feeder carefully.

⚠ CAUTION

Do not place heavy objects (4 kg/8.8 lb. or over) on the original glass and do not force it down.
It may break the glass and could cause injury.

Notes

- When you copy originals with folds or wrinkles, smooth out the folds and wrinkles first. Then, place the original on the original glass and close the platen cover or the Automatic Document Feeder to start copying.
- If a shadow of the folds or wrinkles appears on copies although you smooth out them, adjust the exposure or use the "BACKGROUND ERASE" function.

Tip

When you use the transparent original such as overhead transparencies and tracing paper, place a blank plain sheet of paper - the same size or a larger sheet - over the original, otherwise the copied image could be stained.

- **Placing originals on the Automatic Document Feeder**

- 1) Align all the originals.
- 2) Place them face up and align the side guides to the original length.

Notes

- The top sheet of the originals will be scanned first.
- Do not load more than 50 originals (80 g/m², 20 lb. Bond) at once, and make sure the thickness of the stack of originals does not exceed 9.5 mm regardless of their size.
- When placing long originals (A3, B4, A4-R, LD, LG, COMP, or 8K), open the original holder so that the size of the original can be detected correctly.

- To prevent long originals (A3, B4, A4-R, LD, LG, COMP, or 8K) from sliding out when, extend the paper exit stopper and raise the sub-stopper. When you have finished using the stopper, lift it slightly and slide it back in.

2 Enter the number of copies with the digital keys.
